First Reports of the Hiv-Aids Virus 1981-1982

Pneumocystis Pneumonia—Los Angeles
Centers for Disease Control, June 5, 1981

In the period October 1980–May 1981, 5 young men, all active homosexuals, were treated for biopsy-confirmed *Pneumocystis carinii* pneumonia at 3 different hospitals in Los Angeles, California. Two of the patients died. All 5 patients had laboratory-confirmed previous or current *cytomegalovirus* (CMV) infection and *candidal mucosal* infection.
